

Maintain your asset smartly with CAMO

Ownership and management of aircraft assets demand the fulfilment of numerous legal and technical requirements. With its CAMO (Continuing Airworthiness Management Organization) team Lufthansa Technik is able to offer services supporting aircraft owners such as lessors and banks in meeting these requirements. Moreover, customized services are offered to Air Operator Certificate (AOC) holders.

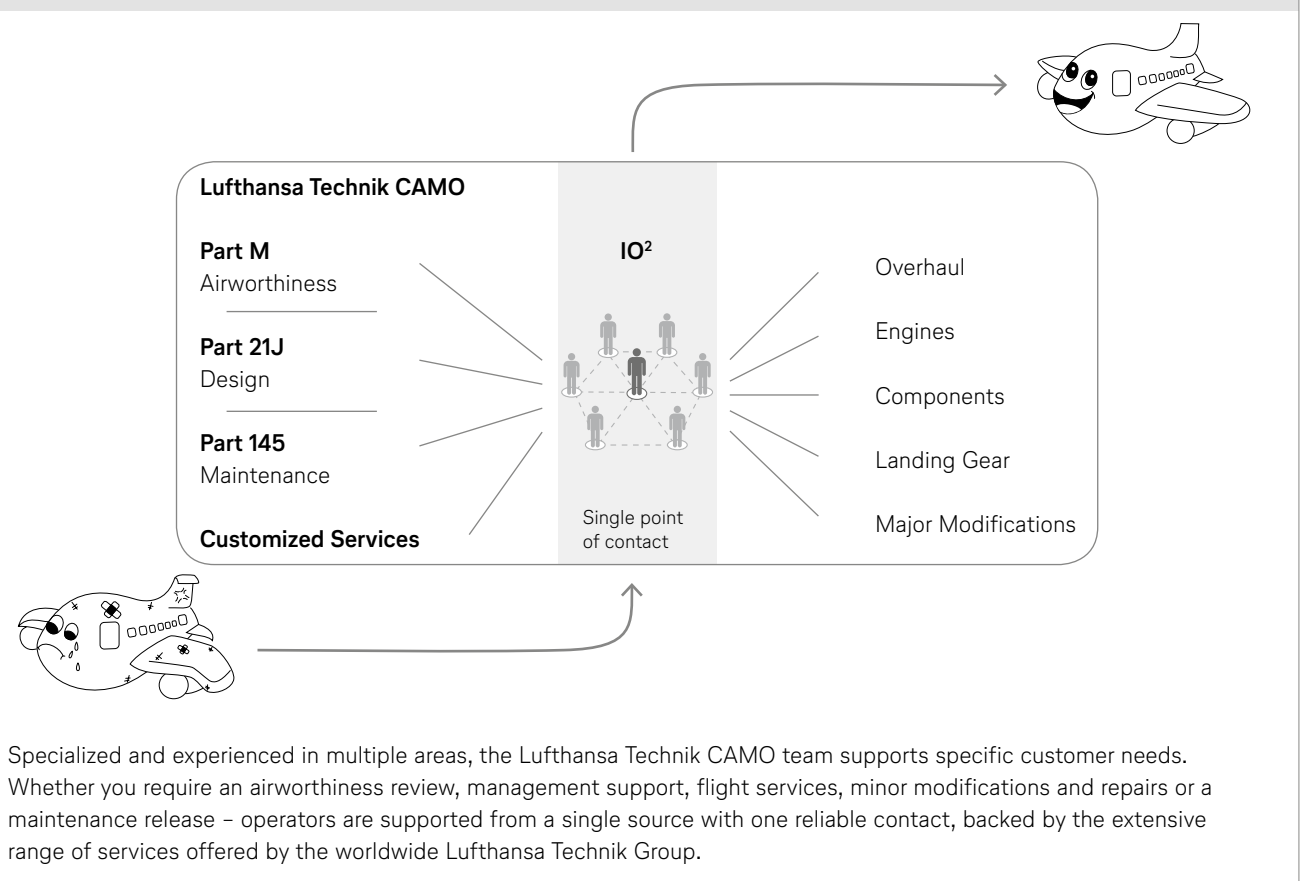

Interface of Organizations – IO²

Several organizations and authorities are involved in complex aircraft projects, each following their own specific rules, each having their own demands. The interaction between them typically entails numerous challenges, which potentially impede a timely completion of the project. Effectively handling these challenges by managing the collaboration of all parties involved is the key to success. Our Interface of Organizations (IO²) offers just that. A single point of contact within our team will guide you through all aspects of your project.

Capabilities

- Airbus
A320 family, A330, A340, A350, A380
- Boeing
737, 747, 757, 767, 777, 787

The all-in-one solution for your asset

Specialized and experienced in multiple areas, the Lufthansa Technik CAMO team supports specific customer needs. Whether you require an airworthiness review, management support, flight services, minor modifications and repairs or a maintenance release – operators are supported from a single source with one reliable contact, backed by the extensive range of services offered by the worldwide Lufthansa Technik Group.

IO² = Interface of Organizations

CAMO services

Lufthansa Technik offers a progressive range of CAMO services for lessors, banks and commercial air carriers. We handle all aspects of continuing airworthiness for your asset and take over ultimate responsibility in line with applicable regulations. This comprises the development and approval of customized Aircraft Maintenance Programs (AMP), the development and certification of an individual Airworthiness Directive (AD) status and the monitoring of Time Controlled Components (Hardtime Components & LLPs) as well as any due maintenance tasks.

Beyond the management of continuing airworthiness, our approved and authorized staff performs airworthiness reviews on almost any common aircraft type, meeting all legal requirements set forth by EASA. Experience, flexibility and cost-efficiency are making us your first choice for airworthiness reviews required to obtain Airworthiness Review Certificates (ARC), and Certificates of Airworthiness for Export (Export CoA). In addition, a comprehensive aircraft registration support is offered, helping you to acquire a Certificate of Airworthiness (CoA) and put your aircraft on almost any register worldwide.

Competence in airworthiness

These essential services are complemented by a host of tailored services, backed by our profound experience which stems from a considerable number of past projects. This lets us not only handle the straightforward type of projects, it also enables us to master the challenging ones.

At a greater scale, Lufthansa Technik offers extensive asset management services for your aircraft. All relevant data will be collected and stored digitally, allowing access anytime, everywhere. Incomplete aircraft documentation – an issue especially arising during lease transitions, repossessions and aircraft purchases – can be comprehensively recovered, minimizing your risk and the financial impact of these projects considerably.

Services beyond

Lufthansa Technik is more than a mere CAMO supplier. With our operational expertise, we will manage all types of technical flights in their entirety. From the definition and approval of flight conditions to the execution of the flight – if required according to a tailored Check Flight Manual – by specially trained and approved pilots we will ensure your aircraft is in the air in no time and at minimum costs. Our excellent relationships with aviation authorities all over the globe much facilitates meeting your specific needs. The entirety of all afore mentioned competences empowers us to recover seriously damaged aircraft from all around the world and put them back into serviceable condition with reasonable efforts.

By means of our supplementary approval as an EASA design organization, we can offer the straightforward development and implementation of minor modifications and repairs on your aircraft. Lufthansa Technik CAMO is your reliable partner from the smallest of issues up to taking the lead on complex lease returns, transitions, aircraft purchases and end-of-life management.
