

Lufthansa Technik Landing Gear Services UK

Lufthansa Technik Landing Gear Services UK has specialized in the maintenance of landing gears and related components. The company is based close to Heathrow airport in London, UK, and is part of the Lufthansa Technik Landing Gear Services product division.

Service spectrum

With an annual throughput of 400 overhauls, Lufthansa Technik Landing Gear Services UK (LTLGS) is the leading landing gear specialists in Europe. Originally founded as Hawker Pacific Aerospace and renamed by Lufthansa Technik in March 2011, the company is specialized in the overhaul of commercial airliner landing gears. It also services hydraulic and other aviation components.

Lufthansa Technik Landing Gear Services UK offers FAA- and EASA-certified landing gear repairs and overhaul services for commercial and regional aircraft on a total floor space of about 13,500 square meters. All processes – from cleaning to corrosion removal and NDT, machining, chrome plating and painting – are carried out in-house. In addition, the staff also repairs and overhauls other aircraft components. With its state-of-the-art landing gear and hydraulic maintenance facilities close to customers in Europe, Africa and the Middle East, the company provides services for hydromechanical components, flap tracks and carriages.

In focus: Spare parts and AOG services

Lufthansa Technik Landing Gear Services UK operates as a full-service provider. Over 70 complete landing gear sets are available for exchange and loan purposes. As the company specializes in Boeing aircraft types, it offers exchange landing gears for selected Boeing aircraft, for example landing gears for the 777 covering all weight categories. Over 40,000 spare parts are available at any time, either individually or in complete sets. A dedicated AOG support team is available around the clock for destinations worldwide. Typical AOG work includes axle changes, brake sleeve changes, shock strut seal changes and trouble shooting. As a Designated Engineering Representative (DER) of the US Federal Aviation Administration, Lufthansa Technik Landing Gear Services UK is authorized to develop its own repair methods.

Outlook

The business of Lufthansa Technik Landing Gear Services UK has expanded rapidly since it was established in 1998, steadily increasing its product range. To meet the rising demand for landing gear overhaul services, the company is continuously investing in new equipment and machining facilities as well as concentrating on improving its efficiency.

Key facts

Founded	1998 (as Hawker Pacific Aerospace UK)
Personnel	260
Capacity	13,500 m ²
