

Have a »nice« flight!

The »nice« system is the acknowledged industry standard for high-quality in-flight entertainment and cabin management systems on large and small business jets. If you have it in your aircraft, you already know how great it is not to have to get up to change a CD or DVD, to start your favorite Blu-ray movie on an HD display, or to adjust the cabin lighting to create the desired mood. Now there are even more possibilities for you to access all the cabin, communications and entertainment devices on board right from your seat: an array of additional options that is more than just “nice to have” creates an even more enjoyable infotainment experience throughout the entire flight.

Welcome on board

Option 1 – Customized screens

Accessible on demand, this functionality allows you to show individualized screens such as welcome messages, customer logos or splash screens on all bulkhead and seat displays in the cabin.

Individualized welcome screen

Display of your own logos

Striking the right note

Option 2 – Foreign language briefings

Customizable for each A/C, optional audio briefings for take-off and landing as well as for flights over water and through turbulence are available in:

English
Arabic
Chinese
Spanish
Russian
German
or customized

Customizable for each aircraft

More safety

Looks like the real world

Option 3 – Moving map package – »niceview« enhanced

In addition to the standard »niceview« configuration, the customer will get one additional high-resolution (15mpp) continent map, one additional language pack and the choice to select two ultra-high-resolution airport maps (1mpp) out of a pre-selected list of airports.

Now in 3D

Worldwide

Turn your radio on

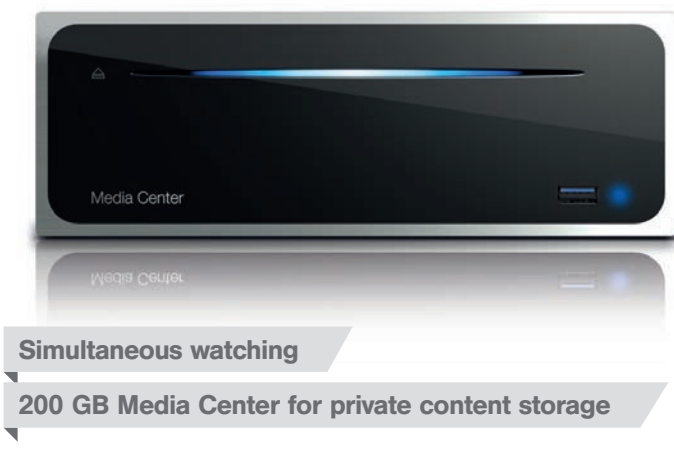

Option 4 – SiriusXM radio

This option provides SiriusXM radio channels (2 commercial-free from 175 total) which can be selected on the »nice HD« GUI and can be controlled through the crew panel or from the master seat location.

2 channels commercial-free music

Controlled from the master seat

Another drive for you

Option 5 – Additional Blue-ray player

The »nice HD« Media Center provides an additional Blu-ray disc drive to enable simultaneous watching. Also, it offers 200 GB of additional storage capacity for movies, music or pictures.

Simultaneous watching

200 GB Media Center for private content storage

With the plane's eye

Option 6 – Tail fin camera

The tail fin camera provides passengers with a continuous wide-angle view and is a unique additional infotainment feature on board, giving an excellent sight during takeoff, landing and taxiing.

Continuous outside view

Excellent wide-angle perspective

Get everything connected

Option 7 – Additional HD multimedia port

The »nice HD« system offers different port modules. The additional HD multimedia port connects headsets, HDMI and USB devices. This option is limited to four additional USB ports per aircraft.

Many connection options

Headsets, HDMI and USB devices

Pairing your devices

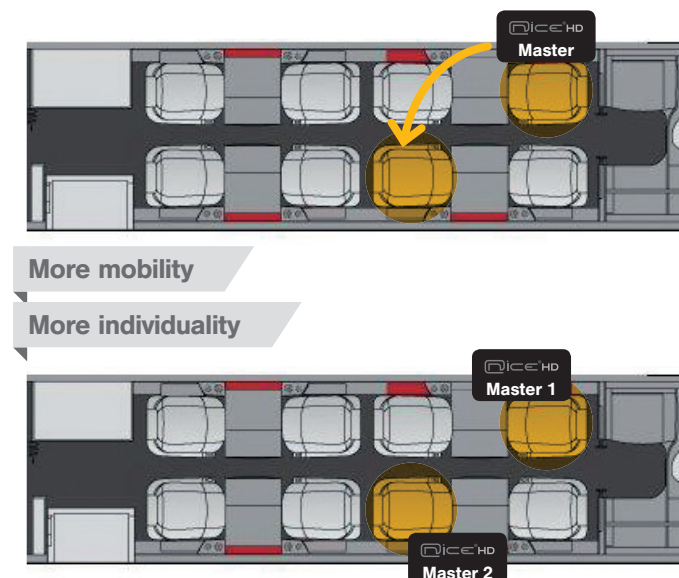

Option 8 – Additional bluetooth port

The »nice HD« system provides the option to easily pair your personal devices with the infotainment system via Bluetooth. Limited to three additional Bluetooth connections per aircraft.

Easy wireless connection

Hands-free connectivity

Your seat – your control

Option 9 – Master seat relocation

If desired, you may relocate the master seat functionality from seat 2 to another specified location. The main functionality of controlling the large cabin screen and speakers moves to the selected seat.

More mobility

More individuality

Option 10 – Additional master seat

The »nice HD« system can define more than one master seat at the same time. All cabin functions can then be controlled from the different master seats.
