

Have a »nice« flight!

The »nice« system is the acknowledged industry standard for high-quality in-flight entertainment and cabin management systems on large and small business jets. If you have it in your aircraft, you already know how great it is not to have to get up to change a CD or DVD, to start your favorite Blu-ray movie on an HD display, or to adjust the cabin lighting to create the desired mood. Now there are even more possibilities for you to access all the cabin, communications and entertainment devices on board right from your seat: an array of additional options that is more than just “nice to have” creates an even more enjoyable infotainment experience throughout the entire flight.

Nice[®] HD

Learjet 70/75

Upgrades for the Learjet 70/75 cabin system

More options – more entertainment

Original Equipment Innovation – OEI by

Lufthansa Technik

Another drive for you

Option 1 – Blu-ray player

The »nice HD« Media Center provides an additional Blu-ray disc drive with the following benefits: it allows simultaneous watching, and in combination with the option Audio and Video On Demand (AVOD) for the »nice HD« Media Center, it offers 250 GB of additional storage capacity for movies, music or pictures.

Simultaneous watching

250 GB Media Center for private content storage

Turn your radio on

Option 2 – SiriusXM radio

This option provides SiriusXM radio channels (2 commercial-free from 175 total) which can be selected on the »nice HD« GUI and can be controlled through the crew panel or from the master seat location.

2 channels commercial-free music

Controlled from the master seat

Looks like the real world

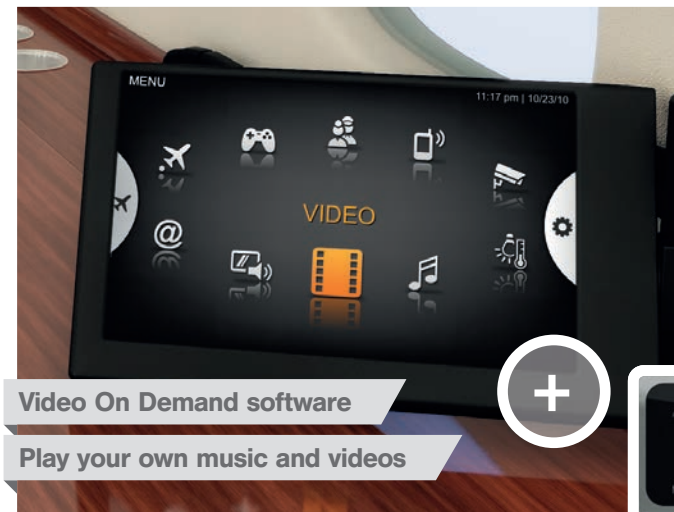

Option 3 – Upgrade to »niceview 3D«

All Learjets have »niceview lite« as a baseline installation. If the aircraft is equipped with a Blu-ray player, »niceview« can be upgraded to a 3D configuration that provides worldwide, high-resolution 3D maps and virtual flights designed to create the ultimate flight information and viewing experience. Also, your customized paint scheme for the »niceview« software can be provided instead of the generic Bombardier livery.

Now in 3D

Worldwide

Your personal media access

Option 4 – AVOD software for Media Center

The **Audio and Video On Demand** software opens up a world of possibilities for you. The AVOD functionality provides individually controlled movie, audio and picture streams at your seat. Also, you can pre-select media via the master or cabin control panel to initiate synchronous stream on monitors, sections, seat displays and/or cabin speakers.

Video On Demand software

Play your own music and videos

Ready for your own movies

Option 5 – AVOD software for local USB players

An additional USB port in the cabin allows you to play media from your own USB drive. Stored data can be accessed and controlled from any seat with an additional USB port, so you and your passengers can enjoy individual media content.

Playing media from your USB drive

Accessible via any panel in the cabin

Full control at your fingertips

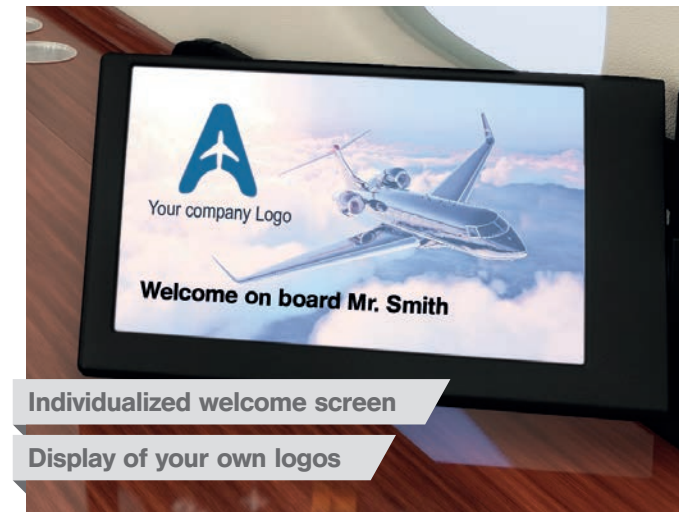

Option 6 – »nice« remote app

The »nice« app provides remote control functions on all mobile Apple devices. It transforms tablets and smartphones into »nice« system controllers, enabling the passenger or crew members to control all cabin functions just as with the passenger or Galley Control Panel. The graphical user interface dynamically adapts to all possible screen sizes and device orientations. The app provides the utmost in flexibility for passengers: one installation on your device works on any aircraft with »nice« on board. The app works not only while a movie is being shown, for example, but also when changing seats or moving through the cabin.

Control functions on all Apple devices

One installation works on any »nice« system

Welcome on board

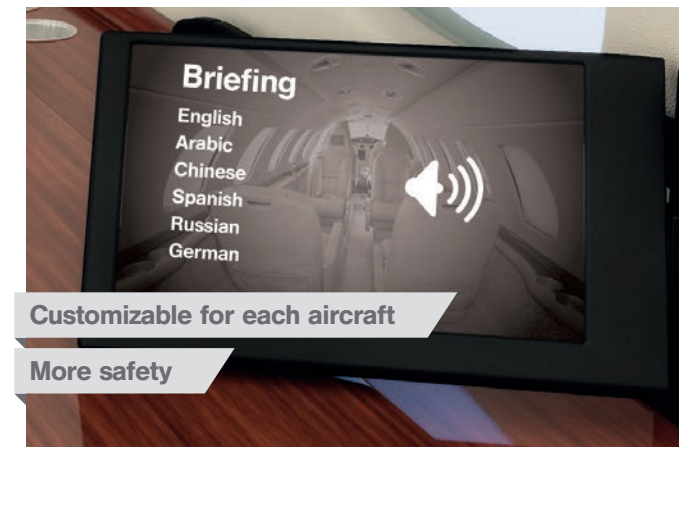

Option 7 – Customized screens

Accessible on demand, this functionality allows you to show individualized screens such as welcome and goodbye messages, customer logos or splash screens on all bulkhead and seat displays in the cabin.

Individualized welcome screen

Display of your own logos

Striking the right note

Option 8 – Foreign language briefings

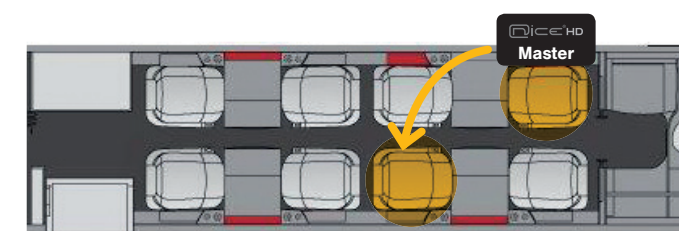

Customizable for each A/C, optional audio briefings for take-off and landing as well as for flights over water and through turbulence are available in:

English
Arabic
Chinese
Spanish
Russian
or customized

Customizable for each aircraft

More safety

Your seat – your control

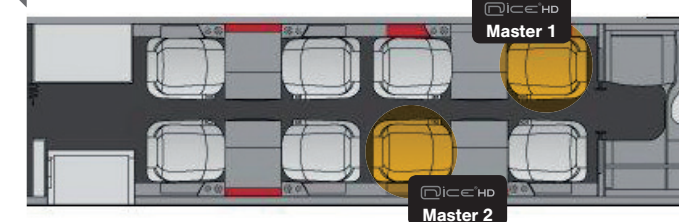

Option 9 – Master seat relocation

If desired, you may relocate the master seat functionality from seat 2 to another specified location. The main functionality of controlling the large cabin screen and speakers moves to the selected seat.

More mobility

More individuality

Option 10 – Additional master seat

The »nice HD« system can define more than one master seat at the same time. All cabin functions can then be controlled from the different master seats.
