

Lufthansa Bombardier Aviation Services

Headquartered in Berlin-Schoenefeld, Lufthansa Bombardier Aviation Services GmbH is specialized in maintenance, repair and overhaul (MRO) services of the Bombardier Learjet, Challenger and Global business aircraft.

Service spectrum

Located at Berlin Brandenburg International Airport, Lufthansa Bombardier Aviation Services is a joint venture of Lufthansa Technik (51 percent), the Canadian aircraft manufacturer Bombardier Aerospace (29 percent) and the Swiss-based business aviation group ExecuJet (20 percent). It combines the expertise of an aircraft manufacturer with the know-how of a leading aircraft services company to offer the most comprehensive range of services for VIP and business jets.

Lufthansa Bombardier Aviation Services offers an all-round service for aircraft, including the full spectrum of line and base maintenance activities, structure inspections and engine services as well as upgrades and modifications. The dedicated AOG team performs on-the-spot repairs at the customer's premises. Lufthansa Bombardier Aviation Services also offers refurbishments, professional cleaning, repair and modifications of VIP and business jet cabin interiors, as well as Fixed Base Operator (FBO) services in co-operation with ExecuJet's FBO in Berlin. The company is an EASA, Bermuda and Cayman Islands approved Continuing Airworthiness Management Organization (CAMO) and further offers Maintenance Management Services (MMS) on behalf of operators.

In focus: Heavy maintenance

May it be the 8C-check on a Global Express, the 96-months inspection on a Challenger series or the 12-year inspection of a Learjet – the biggest maintenance event in a business jet's life cycle can be a major concern to the aircraft operator. With the inspections including the detailed check of the airframe structure, tanks, landing gear, wings, flight controls and all hydraulic and electronic systems, Lufthansa Bombardier Aviation Services' goal always is to streamline even the most extensive overhaul tasks to meet each customer's requirements, reduce costs and bring the aircraft back into service as fast as possible.

Interior Refurbishments and Modifications

Concurrent with the inspection customers may choose to include the refurbishing and modernization of the entire cabin interior. Performed shop-in-shop by the in-house supplier F. LIST GERMANY, Lufthansa Bombardier Aviation Services offers more than fifteen years of experience in fulfilling the highest customer requirements for cabin refurbishments. The company is also Lufthansa Technik's preferred supplier for installing, updating and upgrading Lufthansa Technik's »nice HD« cabin management and in-flight entertainment system.

Outlook

As the leading MRO provider for Bombardier business aircraft in Europe, the Middle East, Africa and the CIS, Lufthansa Bombardier Aviation Services will continue to outpace growth in the business aviation market to cope with the rising demand in the East European region and the CIS.
