

Lufthansa Technik Philippines

Founded in 2000 as a joint venture between Lufthansa Technik AG (51 percent) and Philippine aviation service provider MacroAsia Corporation (49 percent), Lufthansa Technik Philippines (LTP) offers a wide range of aircraft maintenance, repair and overhaul (MRO) services to customers worldwide.

Strategic location

Customers from all around the globe take advantage of Lufthansa Technik Philippines' proximity to international hubs such as Singapore and Hong Kong. Our main facility is located in the special economic zone within Manila's Ninoy Aquino International Airport, allowing for expedited arrival of aircraft parts and reasonable duties and taxes. Line maintenance services are also offered in Cebu, Clark and Davao.

Giving wings to your business

Specializing in base maintenance for A320-family, A330, A340 and A380 aircraft types, Lufthansa Technik Philippines also provides line maintenance services for a wide range of aircraft types. The base maintenance service spectrum includes cabin reconfiguration/retrofit programs and lease return checks available as a stand-alone product or integrated into long-term campaigns.

LTP's facility features eight hangar bays with docking systems accommodating Airbus A330, A340 and A380 as well as Boeing 777 and future aircraft types. Two A380 base maintenance checks can be performed simultaneously.

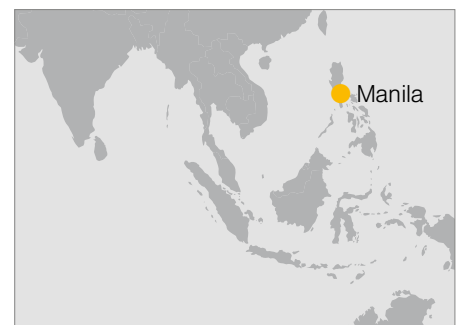

Highly certified – highly trusted

The Civil Aviation Authority of the Philippines, the American FAA, the European EASA and other airworthiness authorities worldwide have certified Lufthansa Technik Philippines as a qualified provider of aircraft MRO services. Our technical services group is certified as a Design Department under Lufthansa Technik AG's Design Organization Approval (EASA.21J.019).

LTP's growth is supported by highly skilled English-speaking mechanics, engineers and support personnel. We source our entry-level candidates from top graduates of major technical colleges and universities. Regular personnel transfers between other Lufthansa Technik subsidiaries and Lufthansa Technik Philippines ensure an optimum transfer of skills to the local workforce.

More mobility for the world

Combining fast turnaround times and Lufthansa Technik's technical expertise with competitive costs, Lufthansa Technik Philippines is a major player in the global aircraft maintenance market.

Key facts

Founded	2000
Personnel	2,500
Area	200,000 m ²
Capacity	8 hangar bays
Parking slots	9 aircraft

Milestones

2000	Handover of technical handling of Philippine Airlines' fleet
2002	Start of A330/A340 heavy maintenance
2005	Start of A320 heavy maintenance
2007	Opening of new widebody hangar
2012	Start of A380 base maintenance
2014	Start of A380 heavy maintenance
2015	Hangar expansion for 2nd A380 line
2016	Start of 777 base maintenance
