

# Single Component Maintenance

Highly reliable repairs

We know first-hand what a single unserviceable part means for airline operations. That's why we offer Single Component Maintenance (SCM), a highly reliable repair process spanning all manufacturers and technologies, old and new. This guarantees your components are returned in serviceable condition and with Lufthansa Technik's globally recognized warranty.

## Broad service for single units

Whether you are a small or large operator, an MRO provider or parts trader, Lufthansa Technik's Single Component Maintenance (SCM) is the product of choice for customized component repair and overhaul. The support ranges from single events to exclusive or non-exclusive long-term agreements covering any scope of part numbers and events. We offer high-quality repair procedures and quick turnaround times by continuously driving innovation and cost-efficiency to new levels. Our experienced engineers develop flexible, custom solutions to give you the decisive competitive advantage. You can rely on our repair procedures and quality proven materials or choose exactly how you want us to repair your part – the result will always meet your highest expectations. A variety of pricing models and product options are also available to suit your needs.

## Your benefits
