

Lufthansa Technik Services India

Component support for Southeast Asia

Key facts

Founded	2005
Personnel	180
Capacity	2,300 m ²

Lufthansa Technik, one of the leading MRO companies in the world, has a strong local footprint in India. From our service center in Bangalore, we provide customers in the entire region with component support and maintenance services for a growing number of aircraft types. Recently, the main focus has been on Airbus A320 and A330 as well as Boeing 737, 777 and 787.

Lufthansa Technik Services India

Service spectrum

As a service center dedicated to supporting airlines in the region and beyond, the Lufthansa Technik subsidiary in India offers fast local material services as well as highly skilled customer services. Our team is fully devoted to helping airlines in every aspect of their component maintenance requirements. Using the extensive network of Lufthansa Technik Group, we have served among others: Go Air, Vistara, Air India, Sri Lankan Airlines, Biman Bangladesh, and Maldivian. Lufthansa Technik Services India (LTSI) also owns and manages the home base material stock for customers in India for both narrowbody and widebody fleets.

In focus

We specialize in component services for the Airbus A330 and A320 family and the Boeing 777 and 737 family. This also includes services related to the supply of consumables and expendables required for aircraft maintenance. Operators throughout Southeast Asia can rely on local customer support, material management, and logistics. In cooperation with the AOG desk of Lufthansa Technik, we offer 24/7 availability for both contract and walk-in customers.

Outlook

In recent years, LTSI has developed into a service center that supports the full service spectrum of integrated and comprehensive Total Component Support (TCS®) and Single Component Management (SCM). Today, the company is an integral part of the global Lufthansa Technik component services network, geared for further expansion in one of the fastest growing aviation markets in the world.
