As experts for all aspects of TechOps Management, Lufthansa Technik Maintenance International provides support for start-up airlines and established carriers alike. With a distinct focus on fulfillment and keeping technical operations as hassle-free as possible, Lufthansa Technik Maintenance International serves as an integrator between the airline customer and MRO suppliers.

# Lufthansa Technik Maintenance International

## Service spectrum

Lufthansa Technik Maintenance International provides line maintenance services and homebase support for airline customers around the world. The company is a 100% subsidiary of Lufthansa Technik and operates under the same aviation authority approvals. The product portfolio is constantly adapted in accordance with customer needs. Lufthansa Technik Maintenance International holds approvals for line and light maintenance for all common commercial aircraft, mainly Airbus and Boeing types including freighters.

## Outlook

With profound technical experience and in-depth knowledge of the aviation business, the maintenance experts of Lufthansa Technik Maintenance International are the right partners to develop customized technical operations concepts for optimal aircraft availability. The consequent focus on customer dedication will allow operators to benefit from industry-leading solutions in aircraft maintenance and service integration.
